## Russia - 2021 quick update

2021 proved to be a good recovery year for Russia. Cement consumption grew by almost 8% following the just over 3% decline in 2020. Consumption thus reached the highest level in the last six years. Nevertheless, cement consumption in 2021 was still 15% lower than the decade high of 2014.

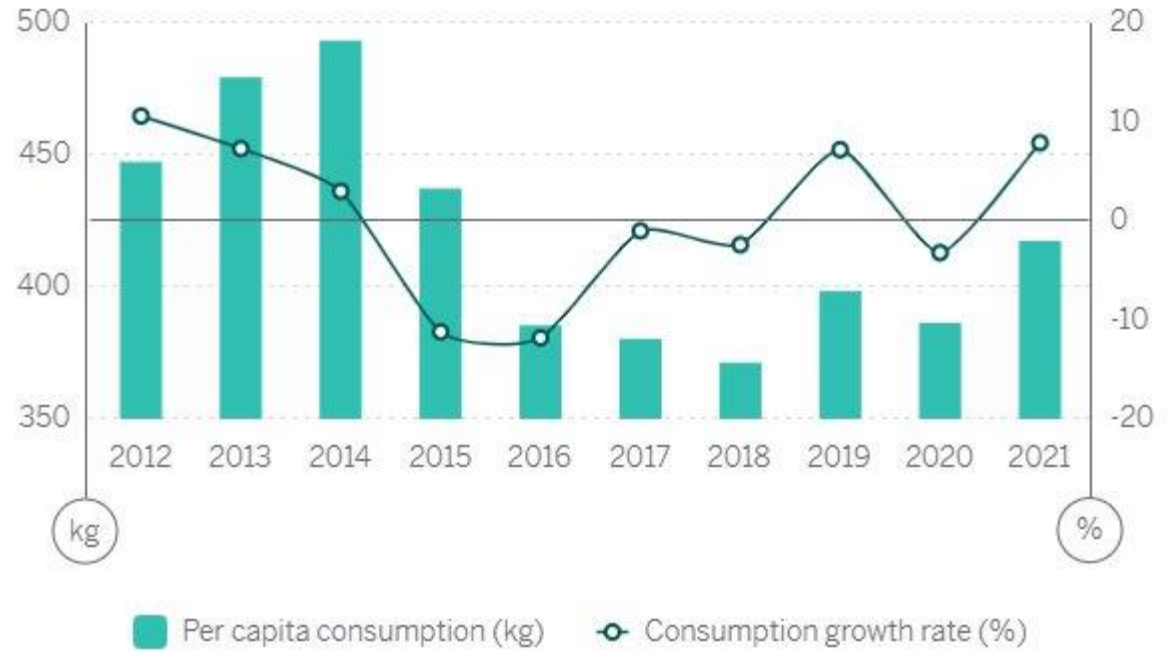

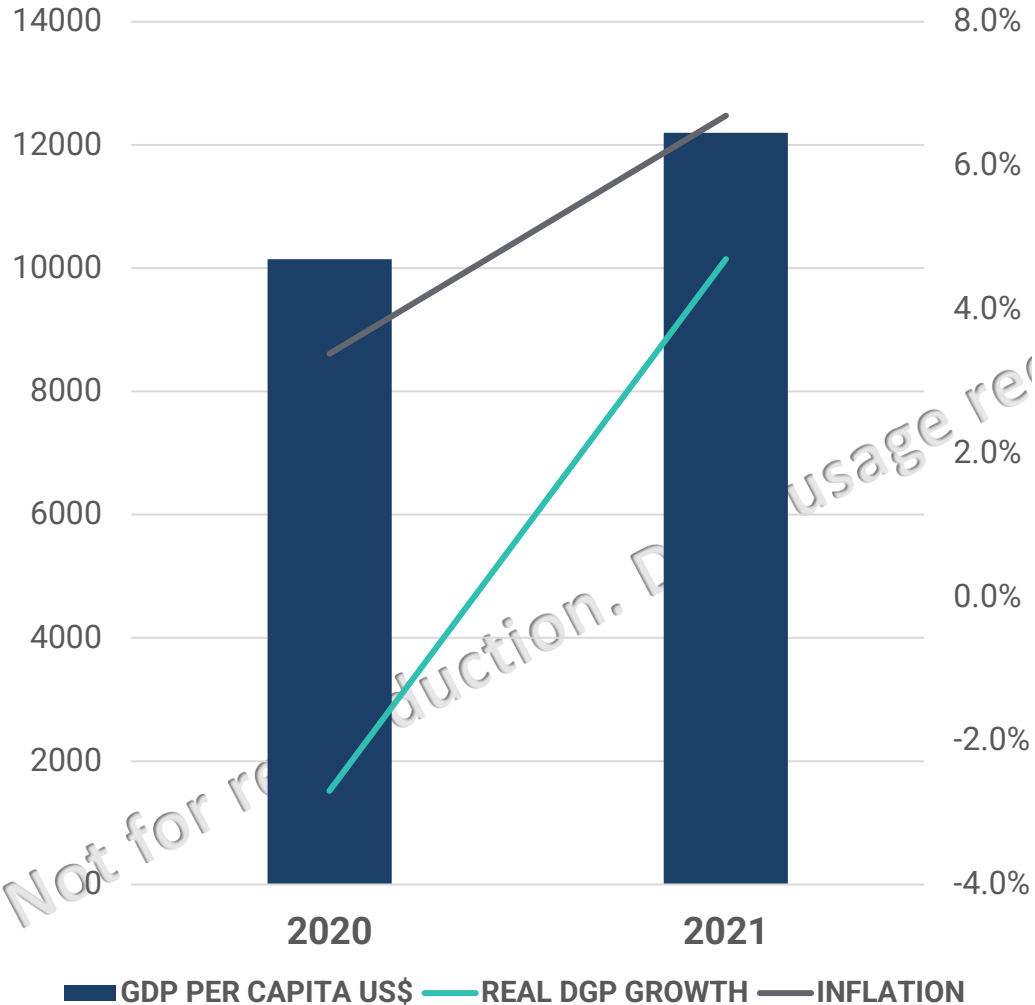

Imports to the country also increased by around 30% over the previous year, whereas exports only increased by around 9%. As a result, production of cement in Russia in 2021 increased by around 7%.

2021 was also the year of the acquisition of the Eurocement Group by SMiKom Group from Sberbank. Otherwise, there were few changes in the manufacturing configuration of the country.
