2021 UPDATES

Major markets series:

Saudi Arabia

Saudi Arabia - 2021 quick update

Surprisingly, Saudi Arabia experienced significant growth in 2020 (close to 21% over 2019) despite the pandemic. In 2021 the market also grew, but by a modest 1.7%. Still, consumption in 2021 stood 14.5% lower than the decade high of 2015.

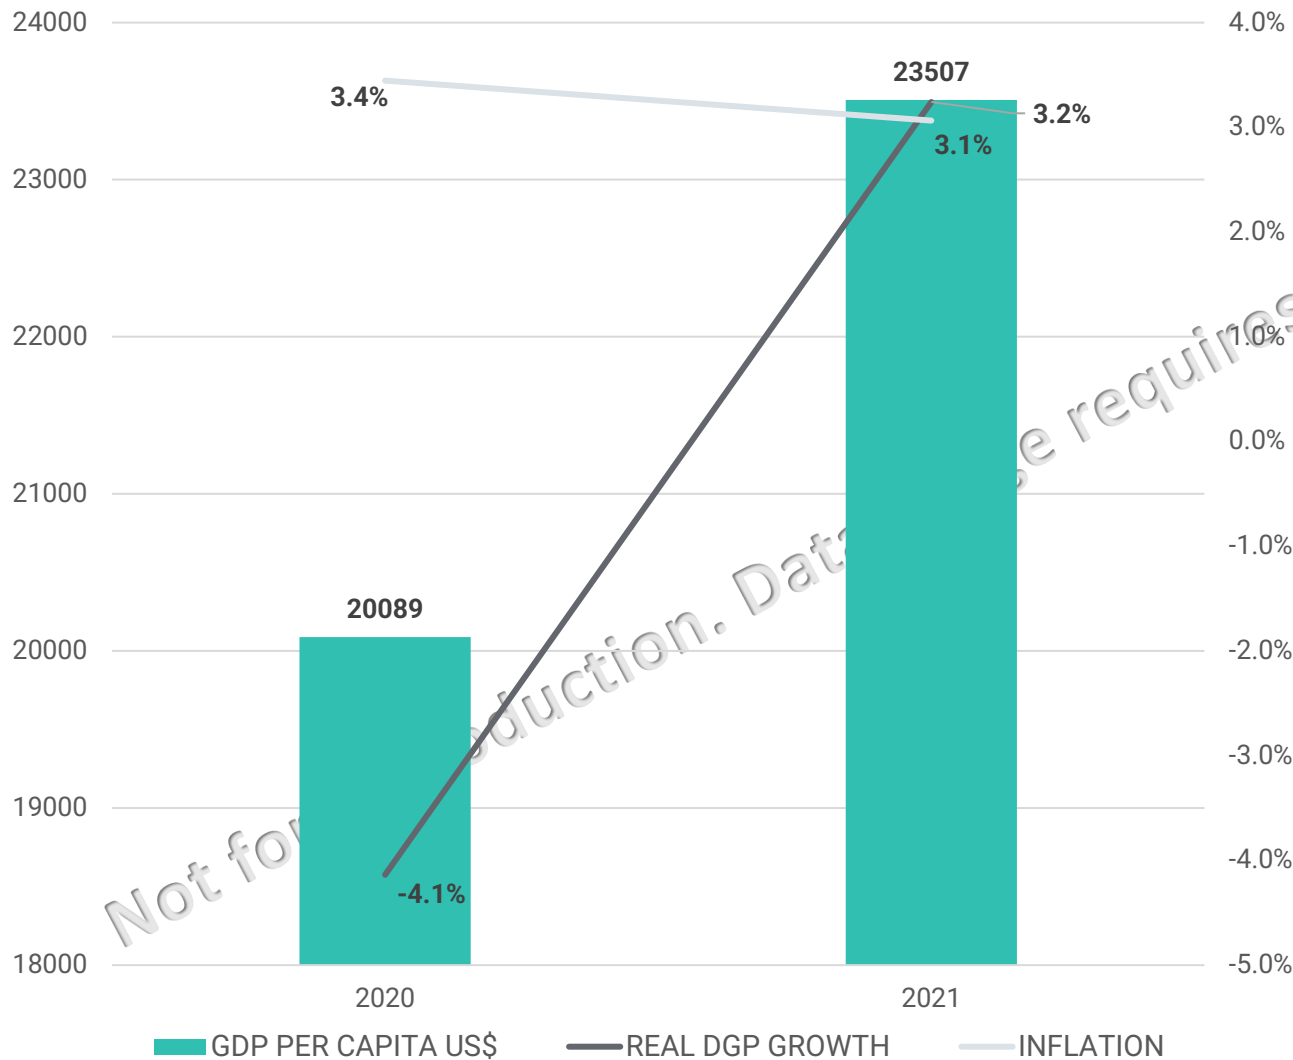

There were no imports into the country in 2021 (as it has been the case for many years now), and exports declined by almost 32%. Nevertheless, exports still count for only 3% of local production so they do not have a significant impact on utilization rates.

There were no changes to the manufacturing configuration of the industry in 2021, except Yamama Saudi Cement Company decided to relocate the former kiln #7 from the older plant to the new location of the Riyadh cement plant by the end of 2024.
